

# Foamy Cleaning Cloth & Special Cleaner for UPVC surfaces

## Foamy

### Use:

Foamy Cleaning Cloth, also called 'Miracle cloth' or Sanding and Polishing cloth (green side polishes / white side cleans). This high-quality cleaning product is the ideal solution for removing/cleaning many soiling on smooth/near smooth surfaces. It is easy to use, very environmentally friendly and does not damage the surface. The cleaning cloth can be reused many times; it becomes smaller but does not lose its effectiveness.

No chemical agents are added. Only water is to be used. The pad must be thoroughly soaked with water and remain soaked. After use, wipe the treated area with a dry cloth. Apply little pressure to the cleaning cloth. It is recommended to test the effectiveness of the cleaning cloth beforehand on an inconspicuous area.

For optimal use, it is best to cut the Foamy into four pieces.

### What can be removed with Foamy Cleaning Cloth?

- Ballpoint/fountain pen marks
- Marks from coloured pens and felt-tip pens
- Nailpolish
- Graffiti
- Soot
- Black marks/smears (shoe polish, etc.)

### What are the advantages of Foamy Cleaning Cloths?

- Minimal water consumption
- Very environmentally friendly
- No health hazards
- Easy to use
- Cost-effective
- High-quality cleaning

### Special Cleaner for UPVC surfaces

When Foamy Cleaning Cloth is used in combination with a Special Cleaner for UPVC surfaces (spray can), virtually all types of soiling can be removed from smooth/nearly smooth surfaces. Spray the Special Cleaner onto the contaminated surface or onto a lint-free cloth (to protect the surrounding area). Depending on the intensity of the soiling, allow it to work in for a short time. Wet Foamy Cleaning Cloth with water (if necessary, also spray Special Cleaner onto the pad). Remove the soiling with the white surface of the pad, applying little pressure. Remove any remaining traces of the special cleaner with a moist cloth (with water). Then rub with a dry cloth.

It is recommended to test the effect of the pad in advance on an inconspicuous area.
